

Lift and Tilt Table

APPLICATION:

An Airfloat customer required an efficient and ergonomic method for unloading parts at an operator workstation.

SOLUTION:

Airfloat manufactured one of its standard lift and tilt tables. The table incorporates a 30 deg. tilt top and operates at 60 PSI. The tilt top has a 4,000 lbs capacity.

BENEFITS:

- Table reduces bending, reaching, and lifting
- Ergonomic container handling reduces the risks of injury to the operator, thus cutting operational costs.
- Operator fatigue is also reduced, increasing operator effectiveness and quality of work.
- Standard foot control is easily relocated to any position.
