

## Portable Pneumatic Lift Table

**APPLICATION:**

An Airfloat customer needed a lift table that was portable and made of heavy-duty construction.

**SOLUTION:**

Airfloat designed a heavy-duty wheeled base that would support the lift table and a load of 500 lbs. The base includes two foot brakes that can lock the unit in place.

**BENEFITS:**

- Completely pneumatic for low cost operation
- Ergonomic container handling reduces the risks of injury to the operator, thus cutting operational costs.
- Standard foot control is easily relocated to any position.
- Solid steel cross arms
- Unit can be pushed/pulled to other locations.
